| <b>Definition of Shell Building:</b> A shell building is defined as a building for which HVAC, lighting, suspended ceilings, plumbing and electrical systems, partition layouts and interior finishes are not shown on the plans and for which NO SPECIFIC USE or TENANT has been noted. A separate permit with plans for tenant improvements will be required at a later date for completion of a shell building. A "Shell Only" building may include a fire extinguishing system as needed for fire protection requirements and minimal electric for lighting (house panel only) and main under slab sewer drain (not to include fixtures) along with slab floor. Warehouses and industrial buildings shall not be considered as a shell building. NO Certificate of Occupancy shall be issued for any building permitted as a SHELL BUILDING under this definition. |                                                                                                                                                                     |
